

# DESIGN PORTFOLIO

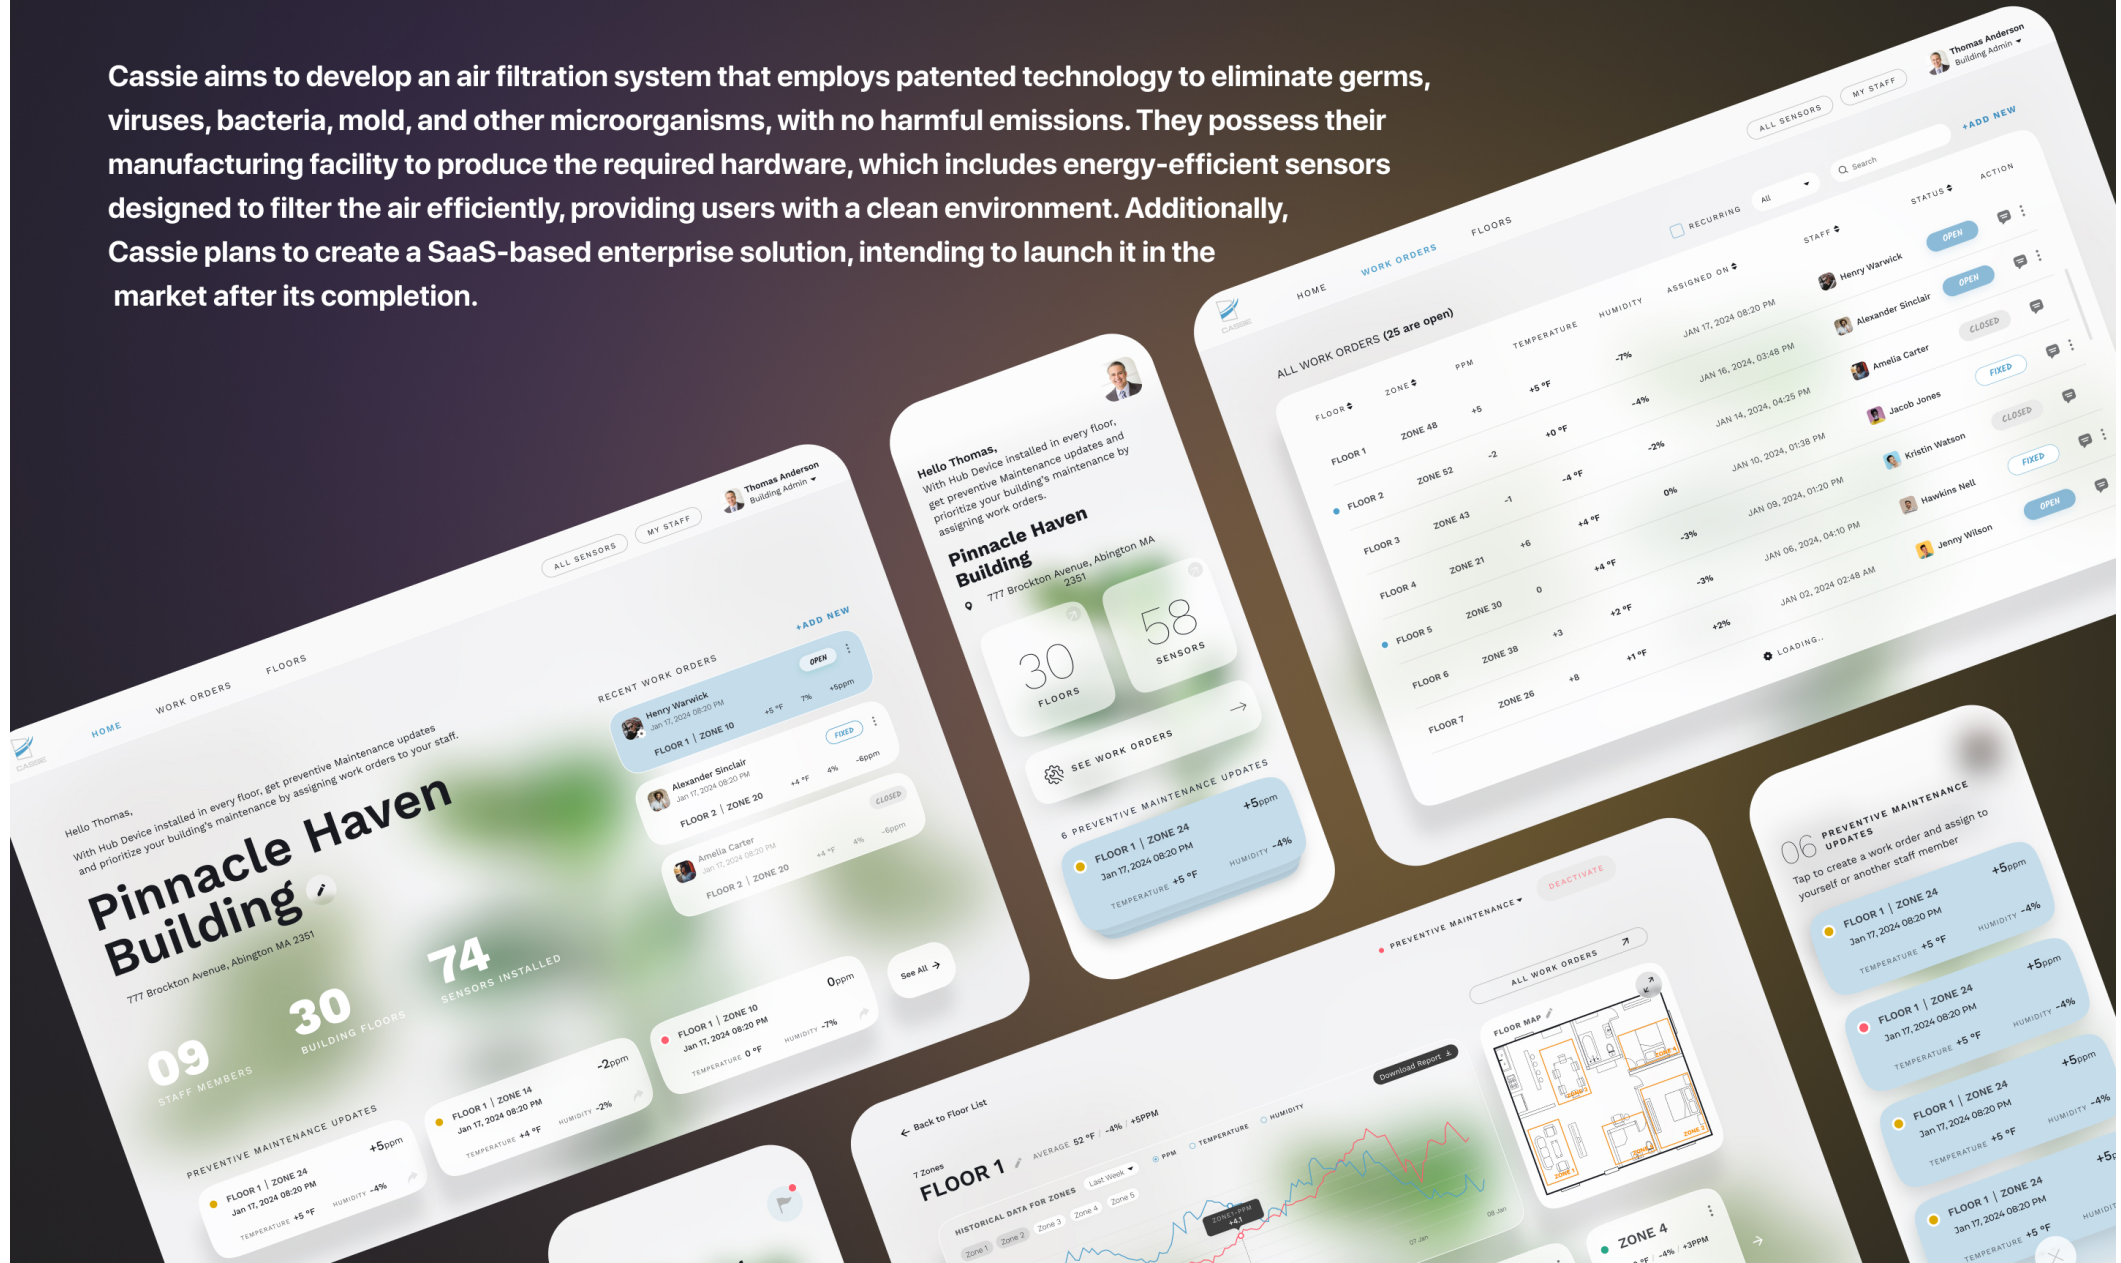

We build software products around your personal brand, Its time to start looking at software as a revenue stream and we can help

# Cassie

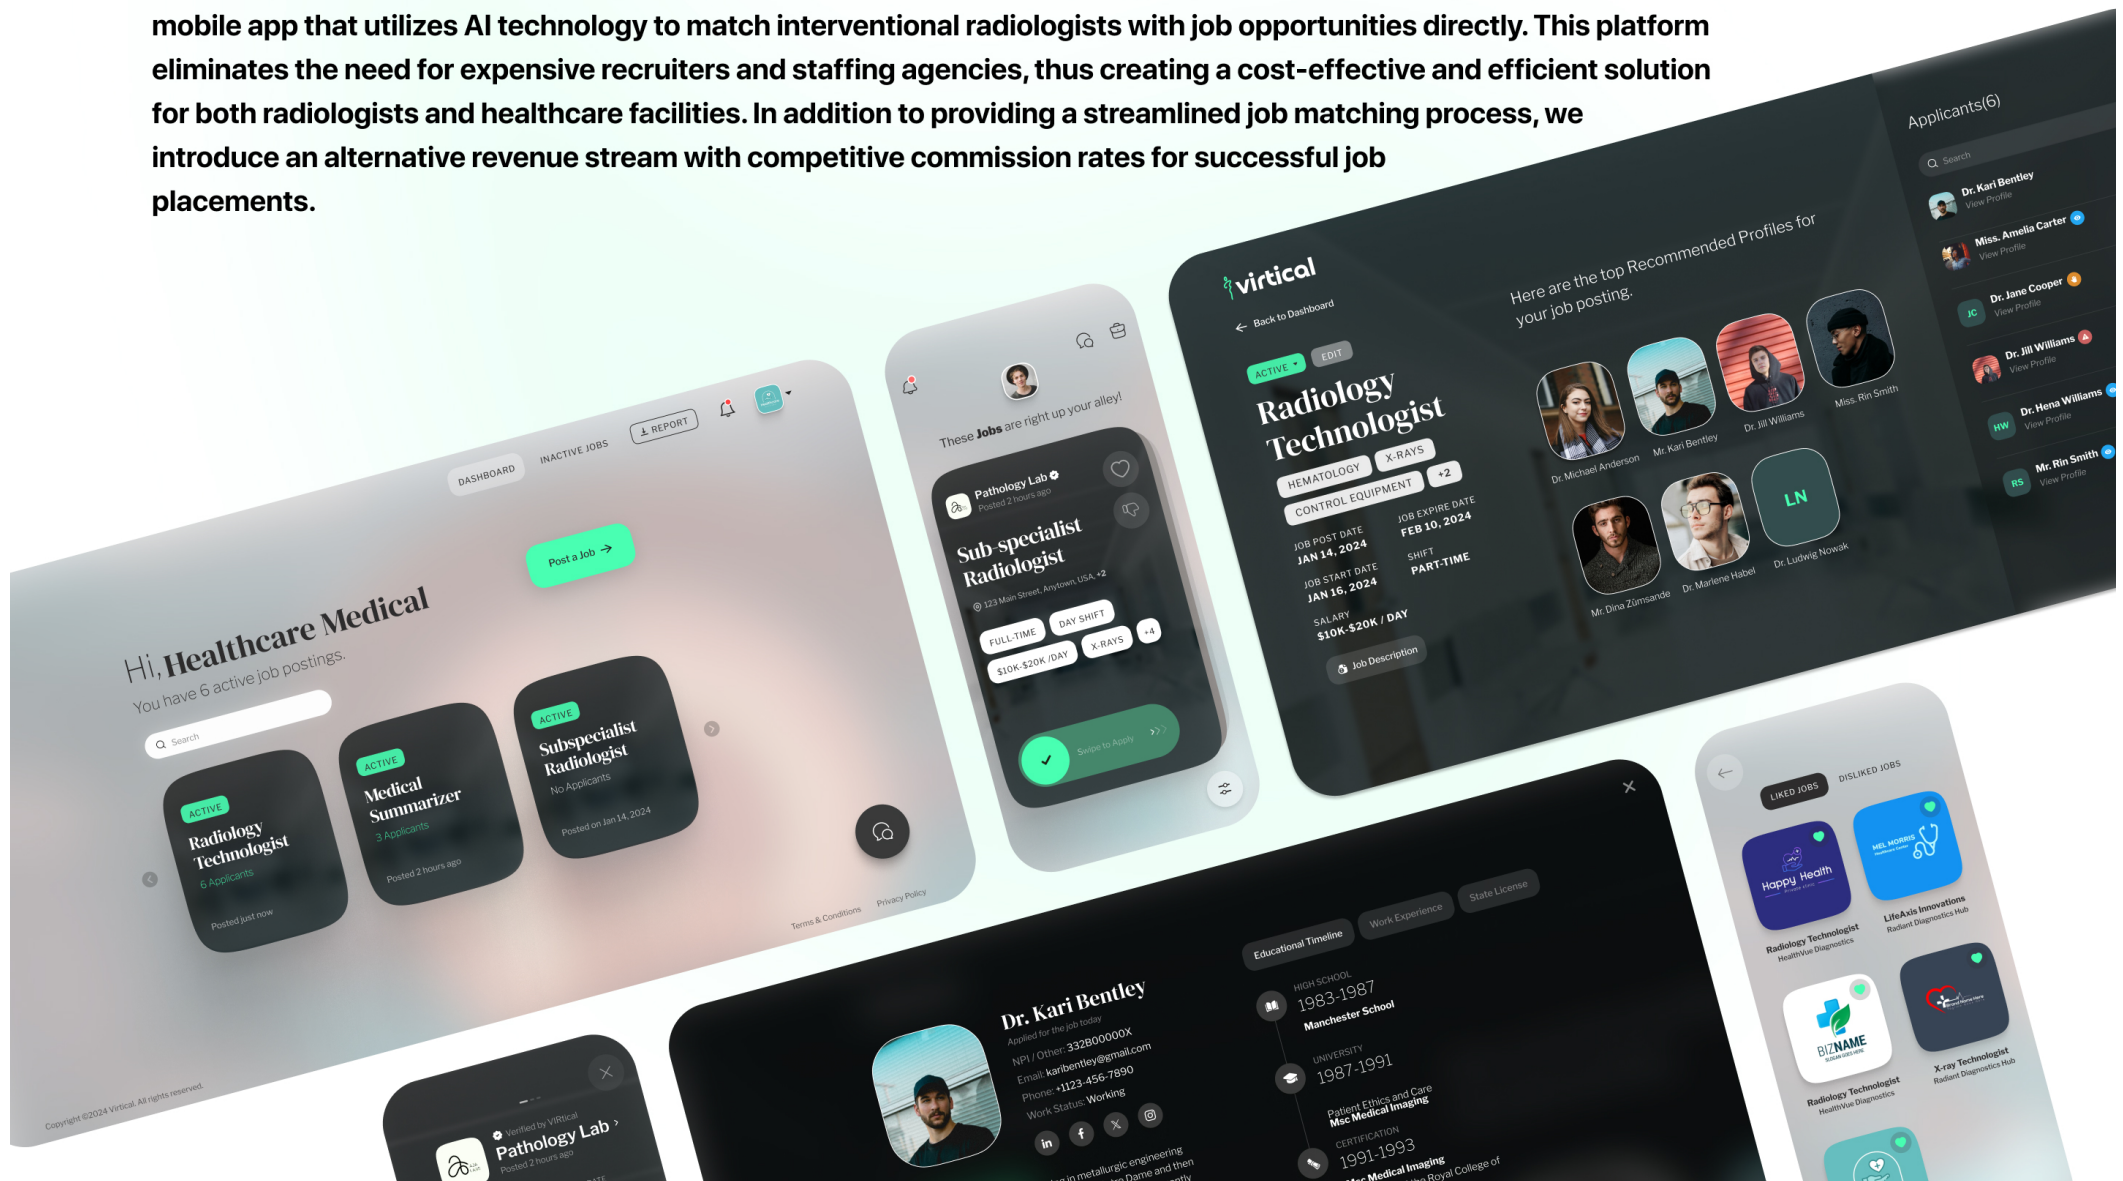

Cassie aims to develop an air filtration system that employs patented technology to eliminate germs, viruses, bacteria, mold, and other microorganisms, with no harmful emissions. They possess their manufacturing facility to produce the required hardware, which includes energy-efficient sensors designed to filter the air efficiently, providing users with a clean environment. Additionally, Cassie plans to create a SaaS-based enterprise solution, intending to launch it in the market after its completion.

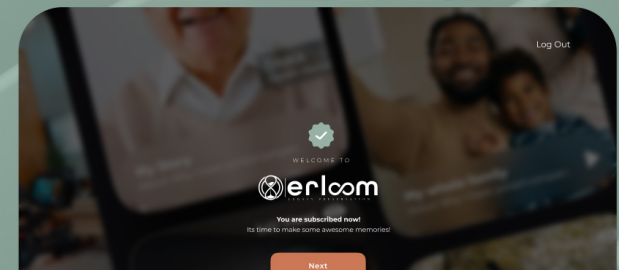

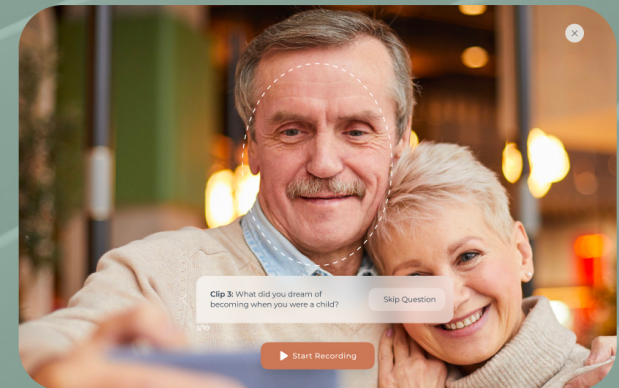

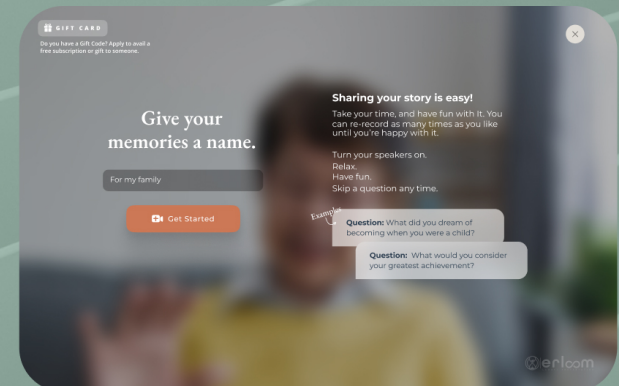

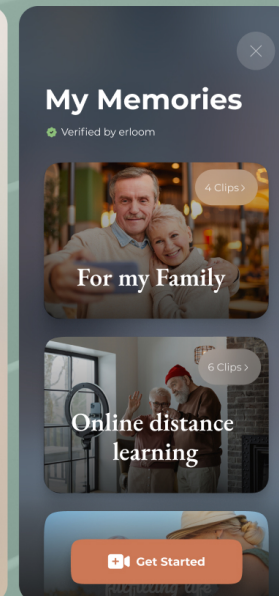

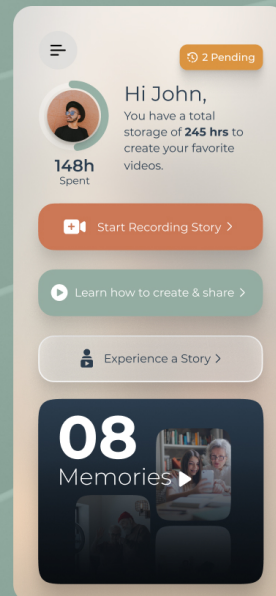

**VIRTical Solutions is poised to disrupt the traditional interventional radiology job market by providing an innovative mobile app that utilizes AI technology to match interventional radiologists with job opportunities directly. This platform eliminates the need for expensive recruiters and staffing agencies, thus creating a cost-effective and efficient solution for both radiologists and healthcare facilities. In addition to providing a streamlined job matching process, we introduce an alternative revenue stream with competitive commission rates for successful job placements.**

“Erloom” platform which is dedicated to building emotional connections to the use of user-led, voice-activated video that leverages AI to enhance engagement and support interactive and conversational video storytelling. Erloom platform would help families stay connected through Connect Legacy, celebrities & influencers have more authentic conversations through Connect Fans and brands create more immersive experiences through Connect Customers.

# GrowME

Best College Prep

GrowMe platform will enable parents & students to connect with counselors and participate in GrowMe's Program which aims at digitally transforming the college preparation process by providing services such as 1-1 Counseling, College Essay Review, one on one Tutoring, and Financial Counseling.

Hello there. I'm here to support you. Can you tell me a bit more about what you've been experiencing?

01:26 pm

Thankyou. I've been struggling to keep up with my coursework.

02:28 pm

Can you tell me which specific aspects of your coursework are causing the most stress?

02:59 pm

It's mostly the amount of reading and assignments I have to complete.

About

Our mission is to turn data into market-beating trading strategies by using sophisticated mathematical models and cutting-edge technology. We pride ourselves on a low-latency technology stack. The core team consists of top-class developers, quant analysts and traders who will use their accumulated know-how to create a state-of-the-art platform. It is an ambitious and exciting start-up project - no legacy code, no mundane maintenance and outdated technologies, just pure engineering joy of creating a well-designed piece of software.

# EVOLVED HUMAN CARE

Evolved Human Care (EHC) aims at shifting the focus from healthcare to overall health, with an emphasis on wellness, prevention, and early treatment. EHC plans to leverage blockchain technology to deliver a secure and accessible electronic health record that prioritizes the needs of both service providers and end-users. EHC will offer a secure, reliable, and fast data management system that addresses the fundamental need for privacy and data security in the healthcare industry.

atient Profile

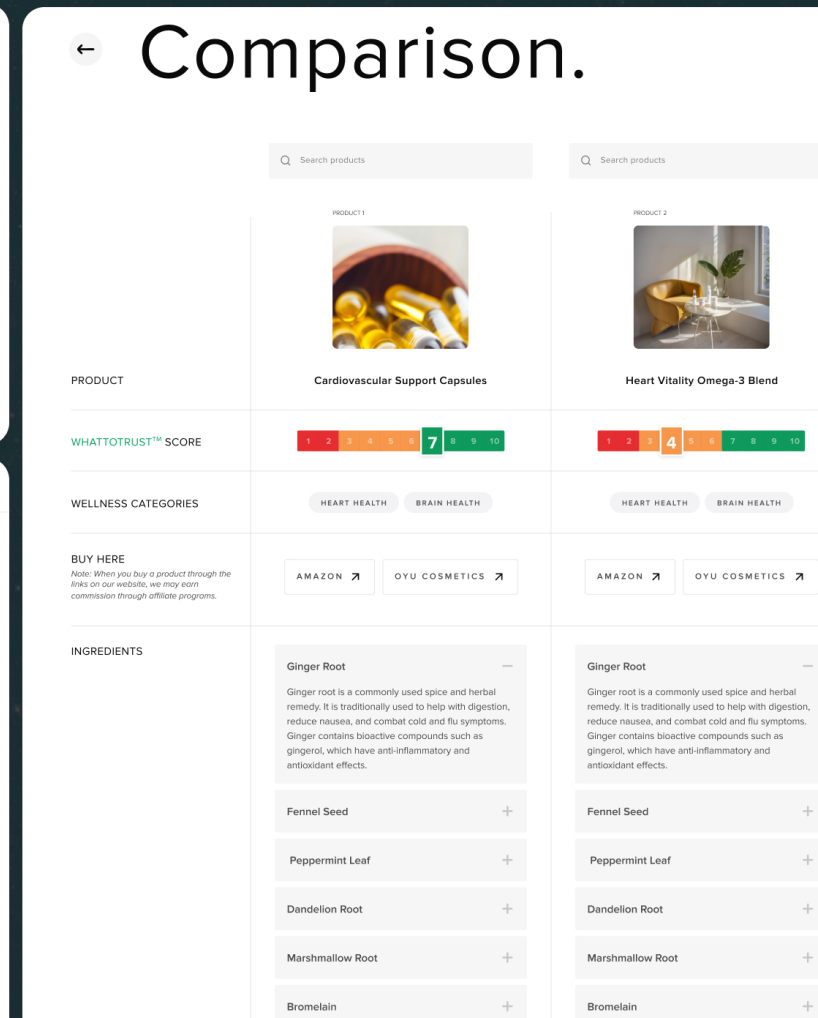

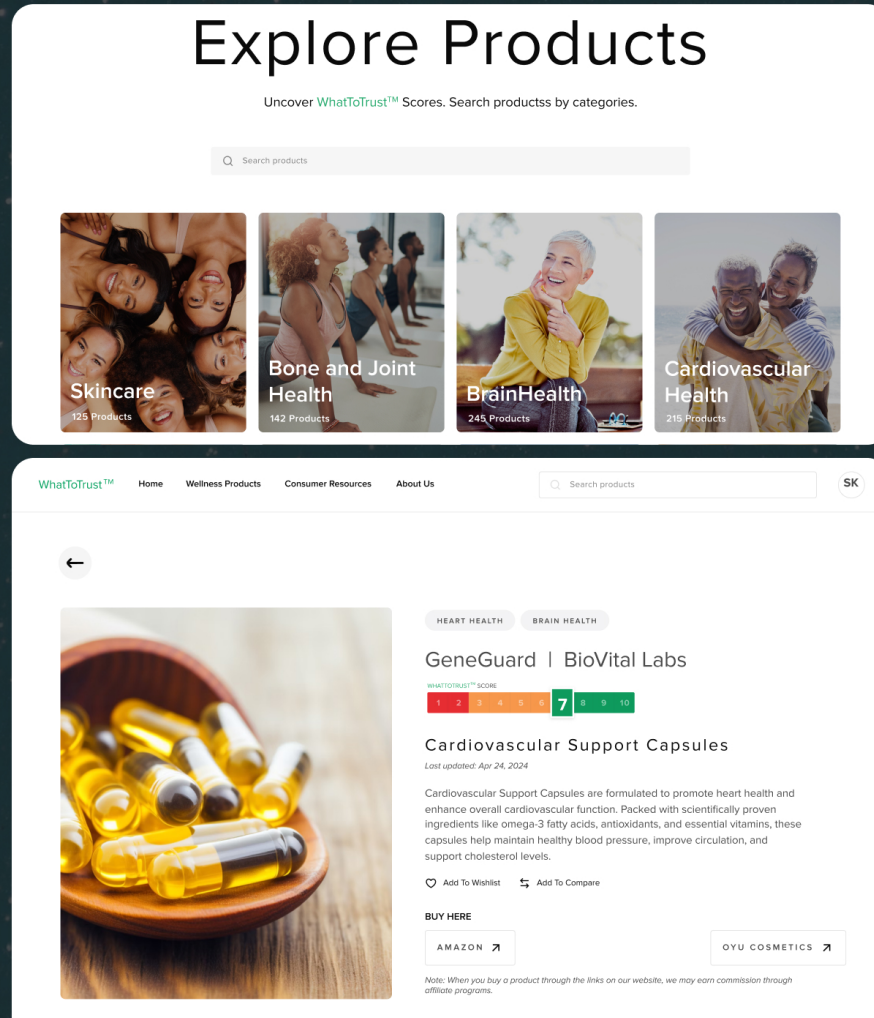

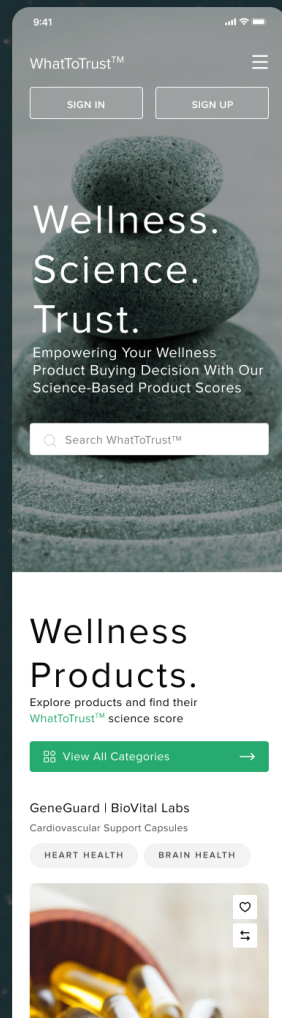

Incentivize App allows users to seamlessly post, track, and organize their diverse project journey, aiming to create a productive social media environment that keeps users engaged through incentives

# WhatToTrust™

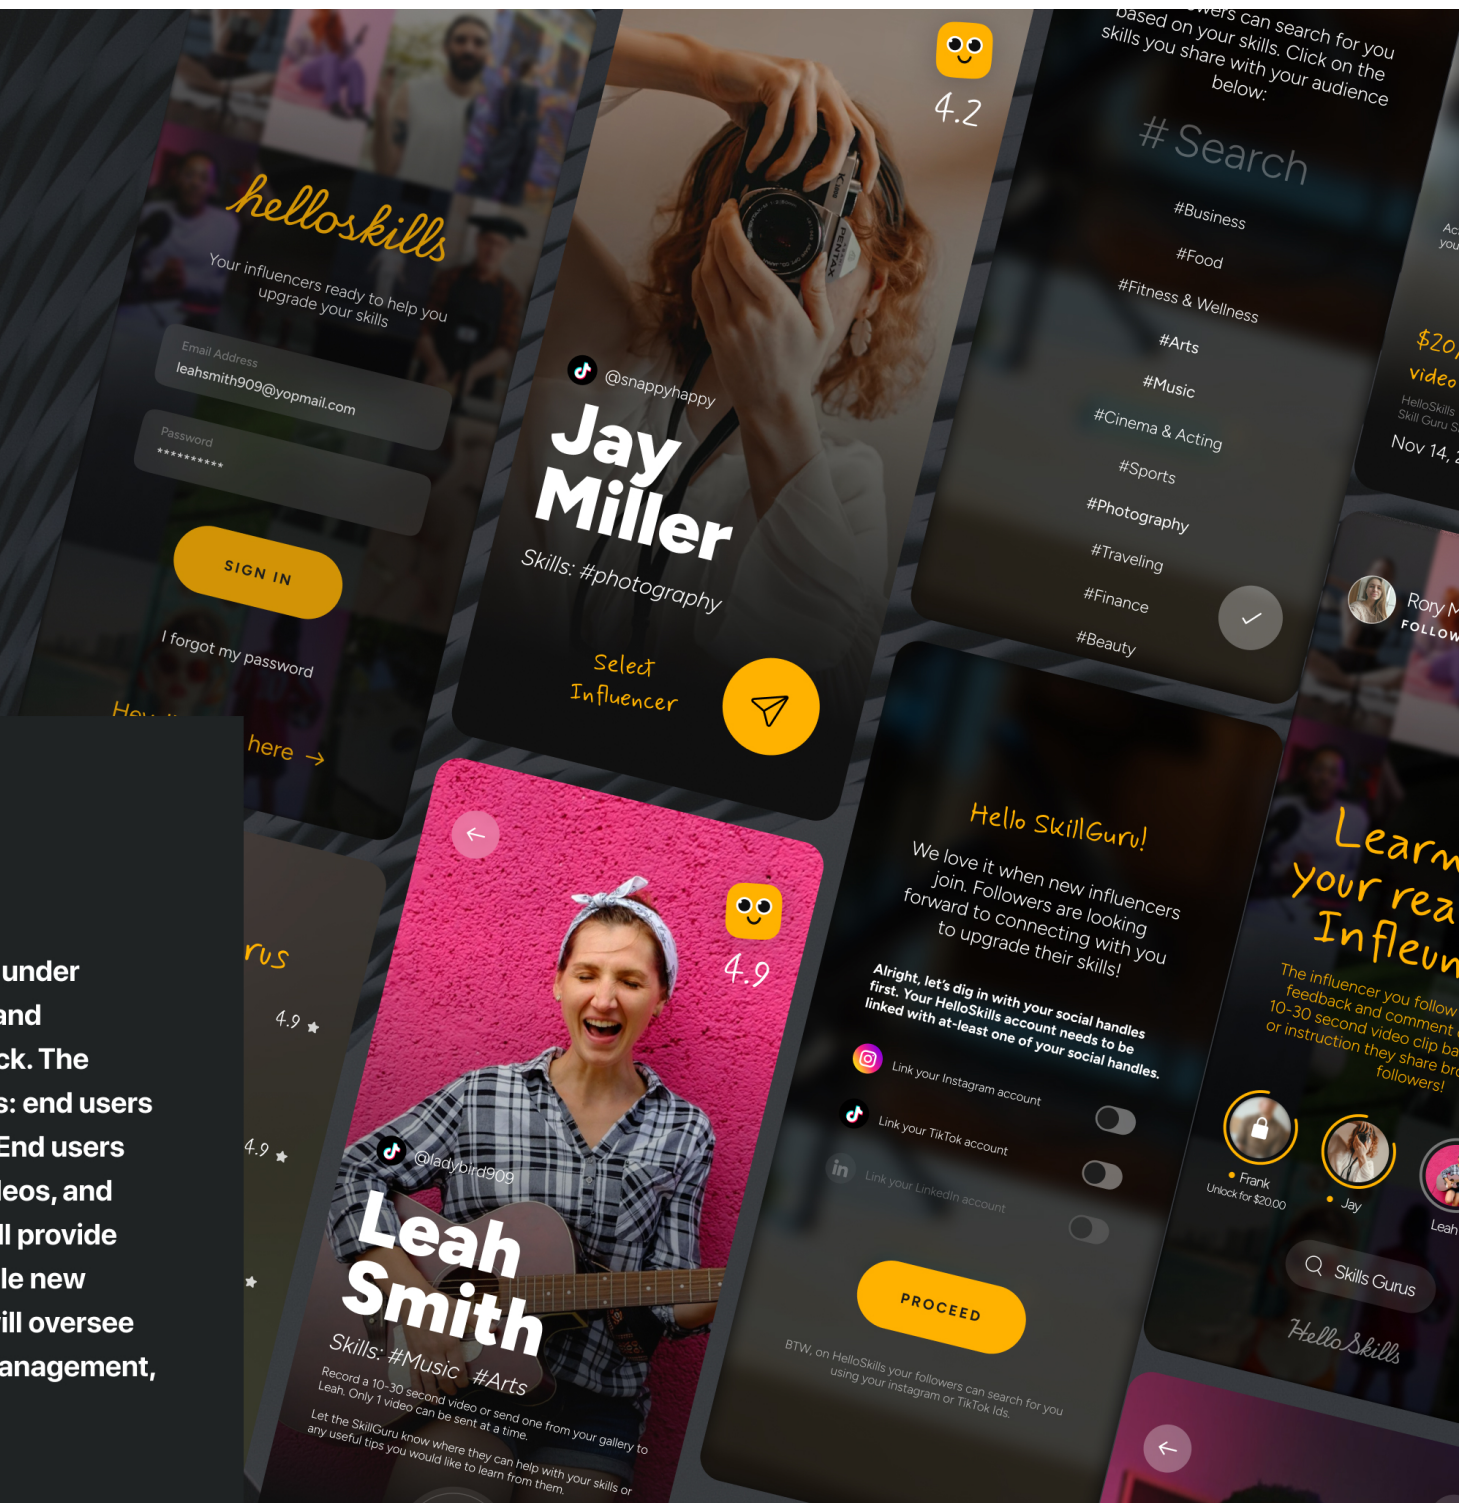

The project aims to categorize and score supplement companies based on their scientific validation practices, from clinical trials to borrowed science. A key focus is on creating a user-friendly web app that allows consumers to access transparent information about product efficacy and scientific backing.

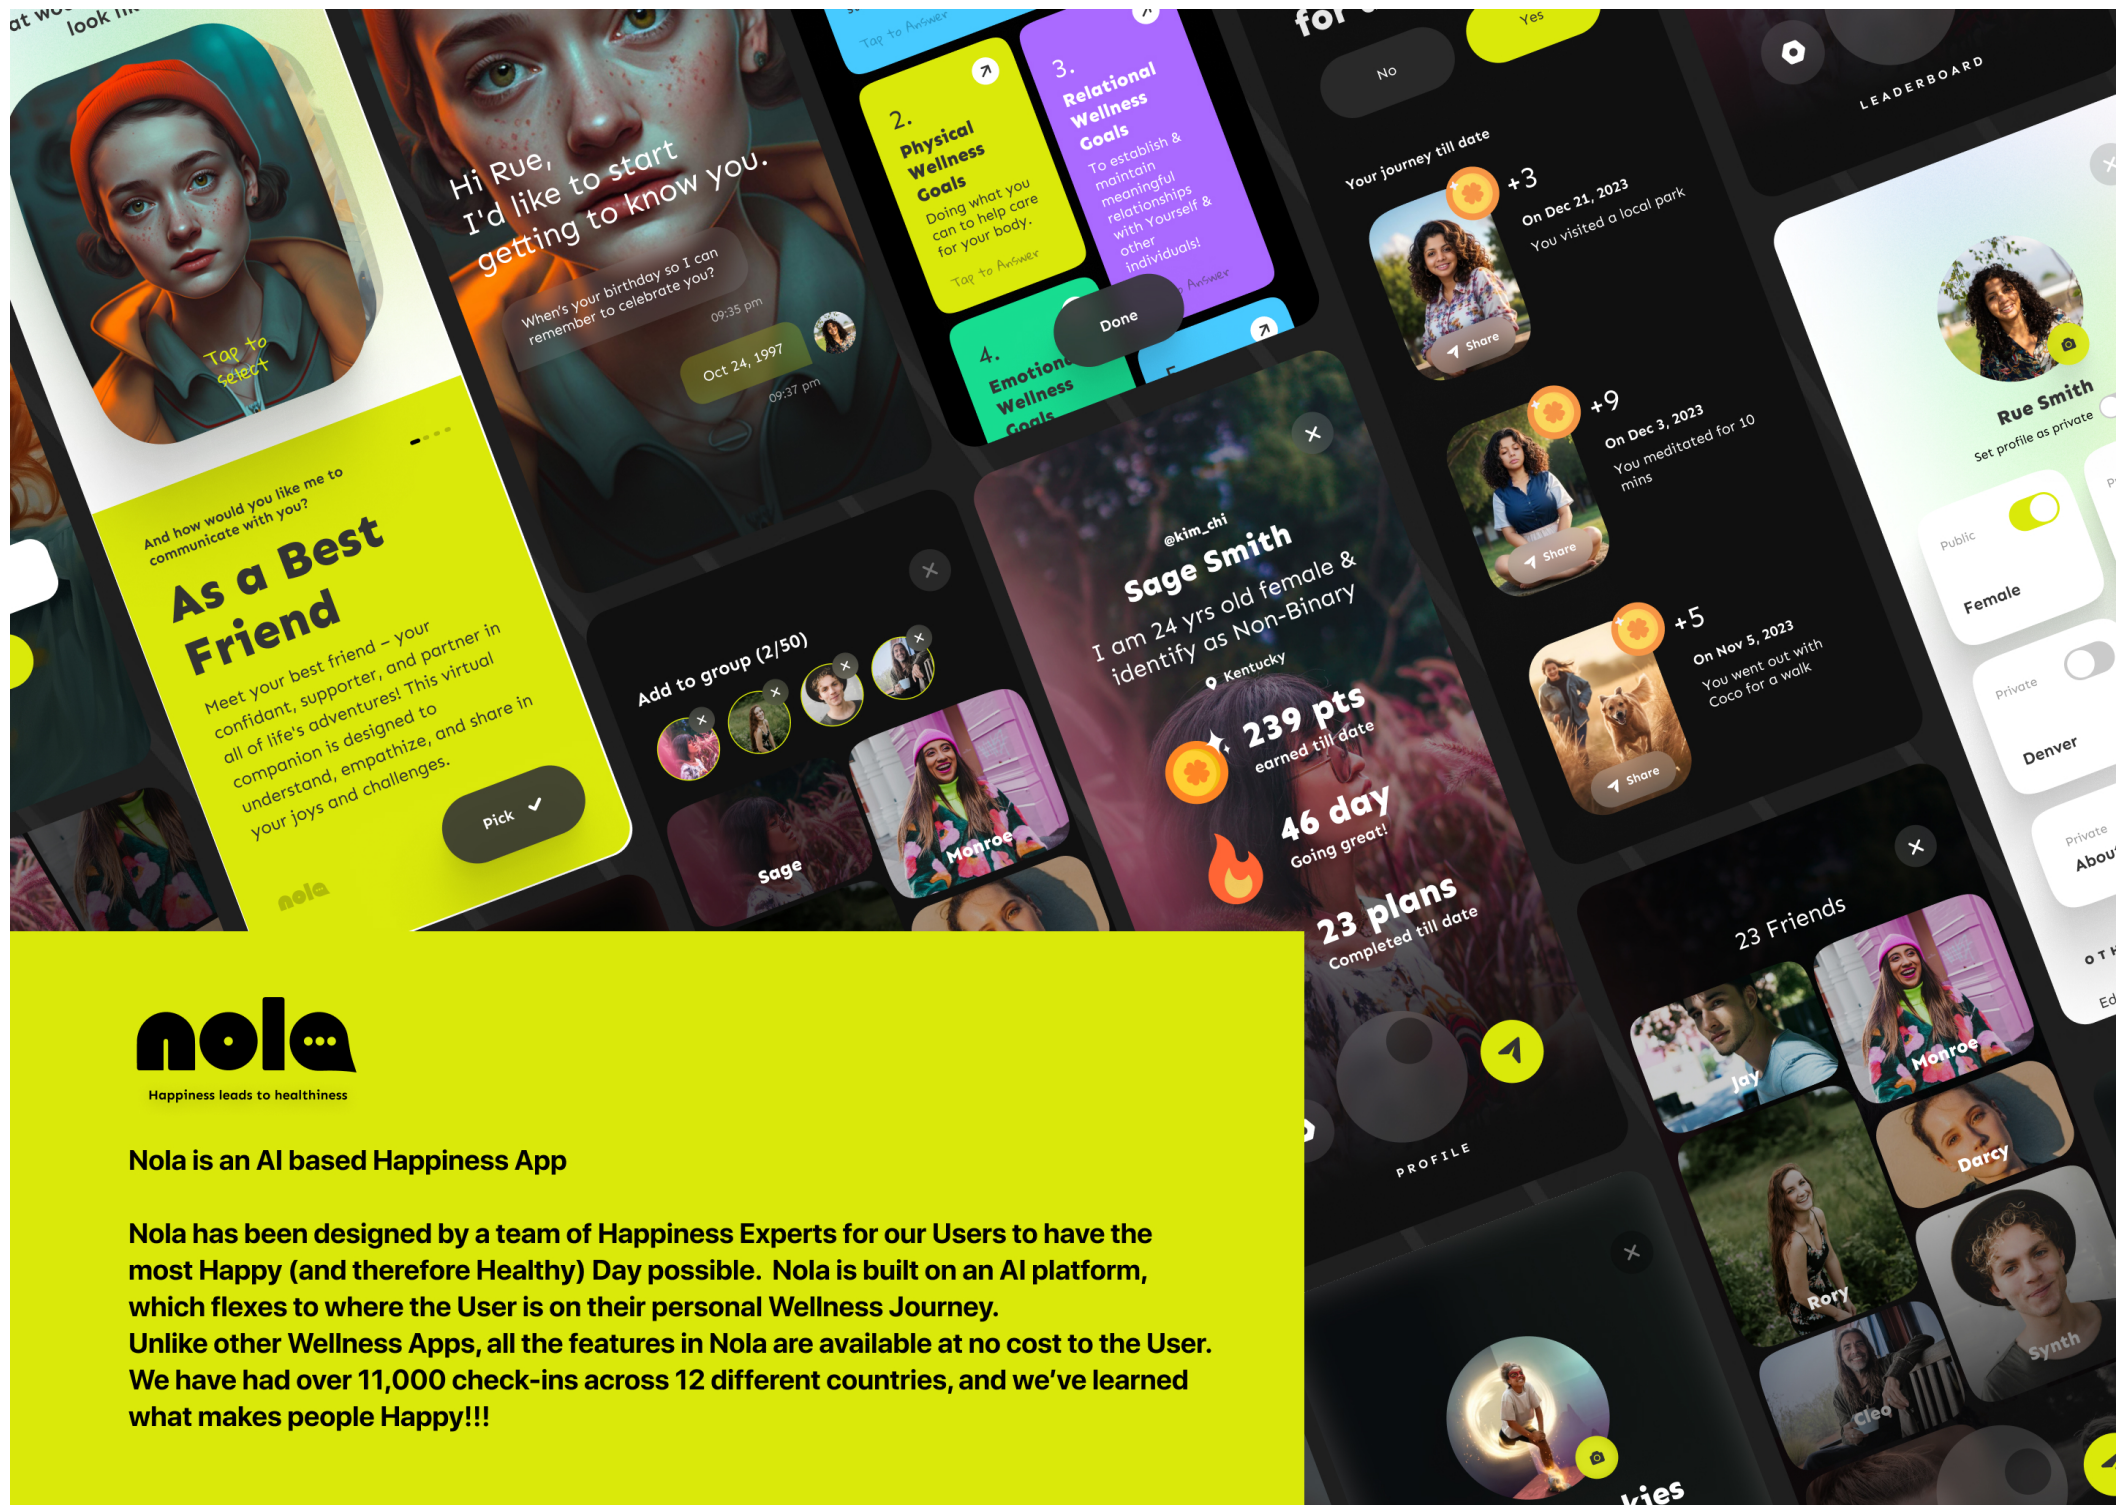

# helloskills

HelloSkills is a platform concept currently under feasibility, designed to connect followers and influencers for personalized video feedback. The platform will cater to two main user groups: end users (followers) and influencers (SkillsGurus). End users can register, select SkillsGurus, upload videos, and receive tailored comments. SkillsGurus will provide feedback, manage their profiles, and handle new video requests. An intuitive admin panel will oversee user and SkillsGuru management, point management, and payment processing.

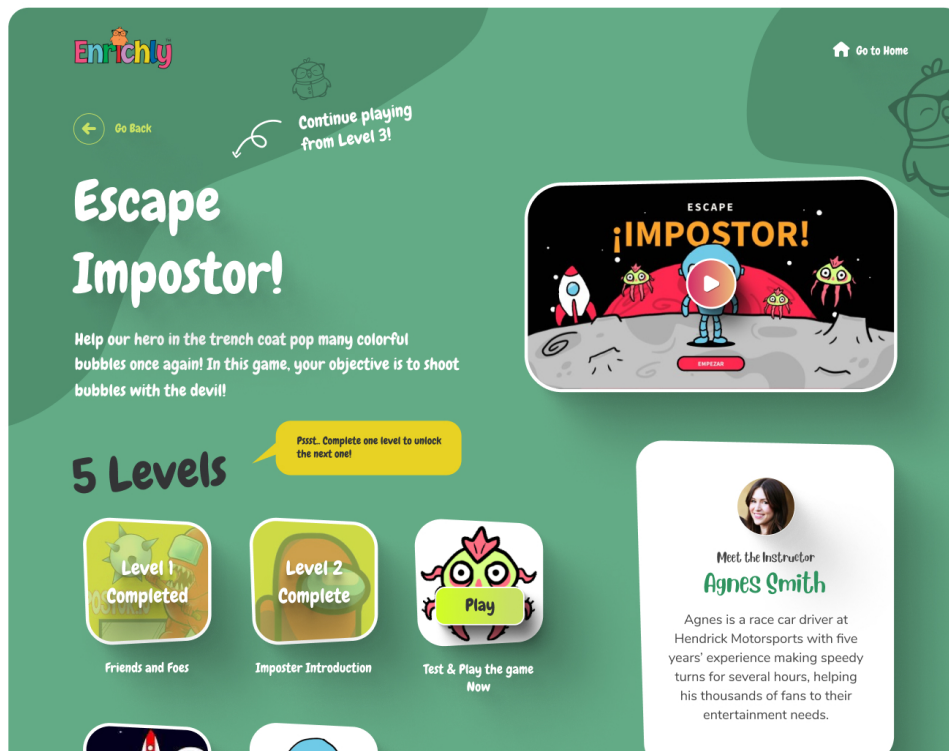

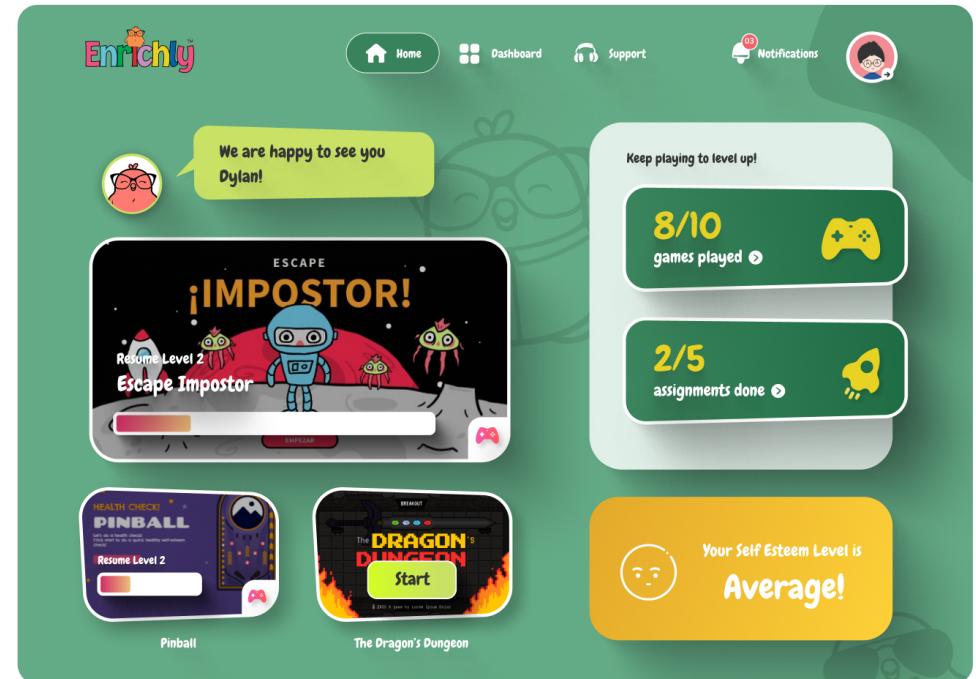

**Nola is an AI based Happiness App**

**Nola has been designed by a team of Happiness Experts for our Users to have the most Happy (and therefore Healthy) Day possible. Nola is built on an AI platform, which flexes to where the User is on their personal Wellness Journey. Unlike other Wellness Apps, all the features in Nola are available at no cost to the User. We have had over 11,000 check-ins across 12 different countries, and we've learned what makes people Happy!!!**

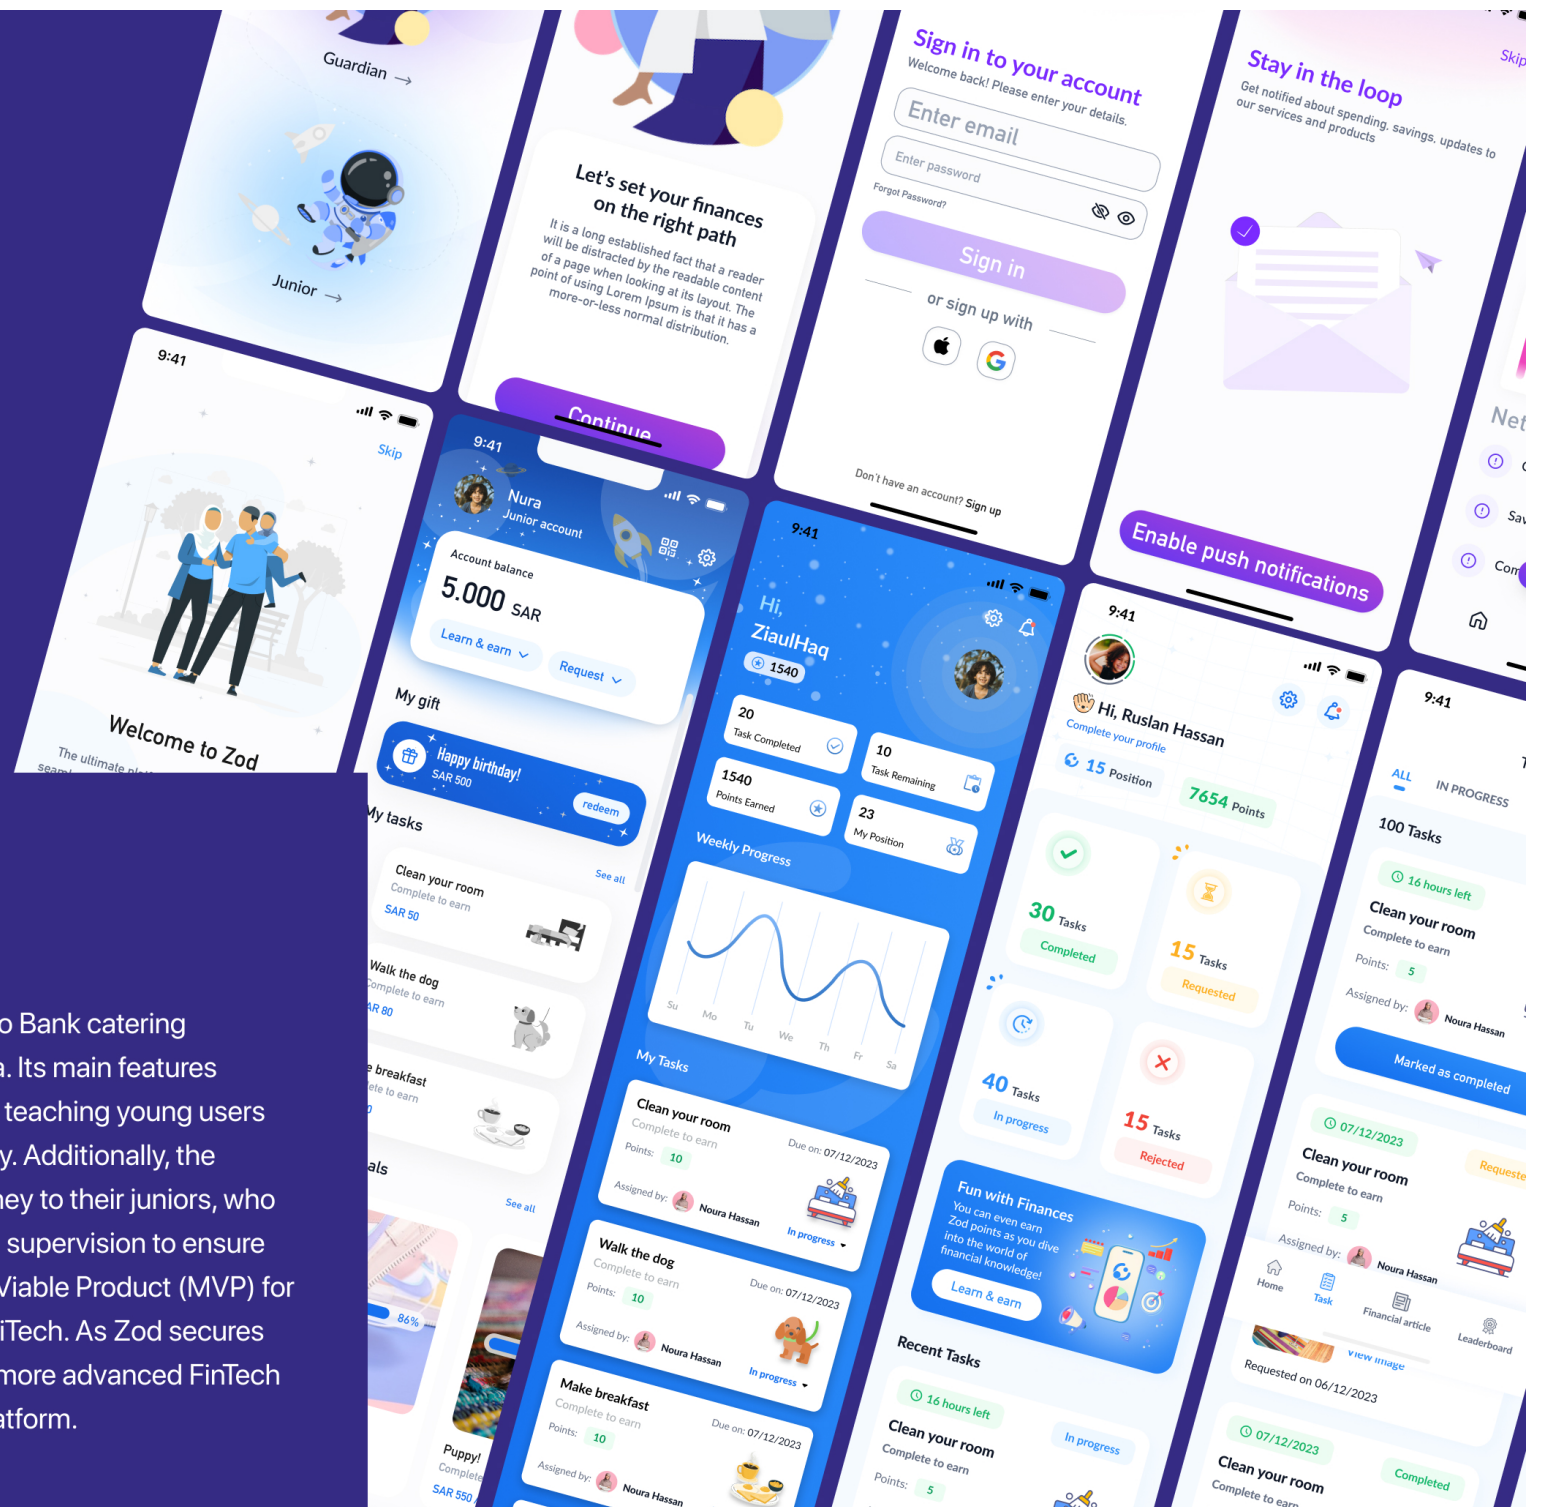

Enrichly is an educational technology platform that is specifically designed to cater to children between the ages of 2 and 12 years old. It focuses primarily on providing courses and programs that aim to enhance children's self-esteem.

The Zod platform aims to serve as a Neo Bank catering specifically to teenagers in Saudi Arabia. Its main features include facilitating money transfers and teaching young users how to manage their finances effectively. Additionally, the platform allows custodians to send money to their juniors, who can then spend it under the custodian's supervision to ensure security. To develop an initial Minimum Viable Product (MVP) for user onboarding, Zod has engaged KiwiTech. As Zod secures funding and obtains a banking license, more advanced FinTech features will be incorporated into the platform.

# SAR

الخطوط الحديدية السعودية  
SAUDI ARABIA RAILWAYS

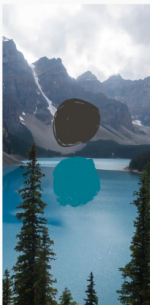

## We bring you a design system built for SAR.

### Brand Colors

A color palette calls out innovation, energy and revolution. It is composed of deep blue and black that promote unity, open communication, and practical living. A purpose to harmonize nature & technology remains in this palette.

We selected blue & black as our primary brand colors.

Insan's legend from SAR

Primary Colors	
<b>SAR Blue</b> HEX #00708F RGB 0/112/143	<b>SAR Black</b> HEX #303030 RGB 48/48/48
Secondary Colors	
<b>Sky</b> HEX #A0C0E0 RGB 160/192/224	<b>Lead</b> HEX #A0A0A0 RGB 160/160/160
<b>Mountain</b> HEX #808080 RGB 128/128/128	<b>Grey</b> HEX #C0C0C0 RGB 192/192/192
Complementary Colors	
<b>Persian Red</b> HEX #C0392B RGB 192/57/43	<b>Sun Yellow</b> HEX #F1C40F RGB 241/196/15

09. Layout

### Logo

The logo embodies the essence of our very foundation - the railway tracks. This unique design symbolizes not just the physical network that connects various destinations, but also represents the journey, the connection, and the progress that SAR brings to the region. The deliberate echo of railway tracks in the logo serves as a timeless homage to the industry, reflecting both its heritage and its path into the future.

Inspiration for The Logo

You can try any of the variations for each logo style!

### A Curated Space

Use the height (x) to learn how much space to be given around the logo.

- Space around the logo**  
The logo must always be perfectly legible and reproduced without obstructions from surrounding images. For that reason, we ask that designers maintain a minimum amount of clear space around the logo, free from other elements.
- White pairing the logo**  
Owner/third party sub-brands that still operate under the larger SAR umbrella will feature "Operated by SAR" next to their existing logos. This positions the SAR logo as a seal of quality while also communicating the relationship between SAR and the owner/third party. It also allows the brand in question to stand on its own.

### Avoid Signature Mistakes

Examples below:

### The Primary Typeface Is Diodrum Arabic

• Sans Serif  
• Extralight, Light, Regular, Medium, Semibold, Bold  
Thanks to our research team, we have a font that fits as our primary typeface!  
Being a monolinear font, Diodrum carries our brand identity quite well. Letters with prominent diagonals have an increased dynamism. Overall, a friendly and legible font and so an excellent choice as it pours versatility into our brand style with its wide variety of font weights.

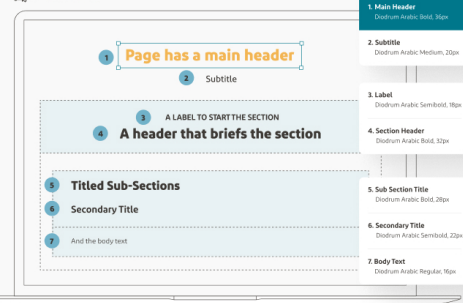

If only you could change the typeface on paper documents.

### & the Arabic type is 29LT KAFF

• Sans Serif  
• Light, Semibold

THIS STANDARD FONT GUIDE

### Which style to use and how to format?

follow To keep it consistent!

### Hyperlink

Hyperlinks or Underline is used only for text links (either hover state or default state, depending on the style of the link).

### Make It Bold!

Bold is used to add hierarchy within a sentence or to call attention, for example, in buttons and texts. It's also used to directly refer to the names of UI elements in running text.

Set an optimum line height which is the amount of space between baselines in a block of text.  
We are using:  
Set up perspicacious unde omnis...  
Sed ut perspiciatis unde omnis...  
accusantium doloremque laudantium.

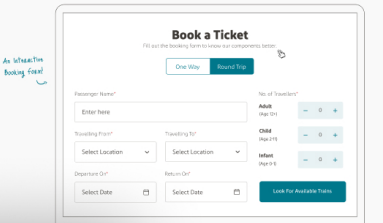

To make our content readable, we have used a standard paragraph spacing.  
We are using:  
Set up perspicacious unde omnis...  
natus error sit voluptatem accusantium doloremque laudantium.

### Form Components

Form components stand out as critical pillars shaping user engagement and communication within our design system. Each component, from text boxes to dropdowns, is meticulously crafted, ensuring they're not just functional but also intuitive and user-friendly. These elements are tailored to simplify data entry, reducing user friction and enhancing the overall interactive experience.
